- Remove the probe from the charger
- Insert the probe into the food to be grilled
- The insertion depth must be beyond the safety insertion line as shown

FAQ

Is the Battery Charged?

1. Take the probe from the charger
2. Press the Button. If the light doesn't appear, then replace the AAA battery.

Is the Probe Charging?

When you insert the probe inside the charger, hold down the button. If the charger light is dim or flashing, then it is charging.

When is the Probe fully charged?

Place the probe in the charger for 10 minutes. Hold down the button and if the light is not blinking or dim, it is fully charged.
